I appreciate any additional content I don't really think this was executed very well. On the bright side the Chevy Napco is a fairly capable scout and despite the GMC being tagged as on-road only I didn't find it getting stuck all that much more than the Napco when taken off-road. Unfortunately the map itself is really devoid of anything interesting both from a landmark prospective as well as the terrain features. The new map certainly doesn't do anything to highlight the capabilities of the GMC if you actually heed the warning of on-road use only as you would likely just drive right past it when you find it in the wilderness. Overall it feels like the devs just phoned this one in; feeling more like a style test for something in Mudrunner 2.. Very Good Game. It would be a lot cooler if you added a few more maps and a 6x6 old time american.
